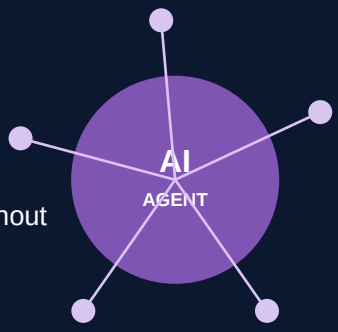
WooCommerce Automation

Run Your WooCommerce Store with One AI Agent

Connect your store and ask about listings, inventory, revenue, customers or SEO - without switching between separate dashboards.



One Connected View of Your WooCommerce Store

1

LISTINGS + SEO

Draft titles, descriptions and tags; audit titles, meta tags and internal links.

2

STORE ANALYTICS

Analyze GMV, orders, AOV, refunds and conversion using connected store data.

3

INVENTORY

Surface low-stock risk, days of cover, overstock and product-level signals.

4

CUSTOMERS

Understand repeat purchase, retention, segmentation and churn-risk signals.

What Can You Automate?

- Listings
- SEO Audits
- Analytics
- Inventory
- Orders
- Marketing
- Reporting

Less Dashboard Switching. More Connected Context.

WooCommerce plugins often solve individual tasks but keep data separated. StoreClaw sits above that fragmented stack, reads across connected data and prepares clear recommendations.

Start Narrow, Then Expand

01
Connect WooCommerce

02
Choose listings, analytics or SEO

03
Review recommendations

04
Approve changes and expand
